BEFORE YOU START

Simple rules for reliable Speedi meals

01

Use the right mode

Choose Steam & Air Fry or Speedi Meals for a wet base below and protein on the upper tray.

02

Control the liquid

Pasta should be just submerged. For rice, use the listed amount and rest it 5 minutes after cooking.

03

Check doneness

Chicken: 74°C • Salmon: 63°C • Minced beef: 71°C.
Add 2–3 minutes only if needed.

04

Know your machine

Names and heat intensity vary by Speedi model. First cook is the calibration run—check food early.

NUTRITION NOTE

Calories and protein are estimates per serving. Brands, trimming and exact portions change the totals.
